

Delivering Change for Panda Leaflet Distribution

Written by Joomla Development Team
Sunday, 11 July 2010 19:34 -

The Impala Web Development team are proud to have worked on the newly launched website for sister company, [Panda Leaflet Distribution](#), who specialise in Leaflet Distribution across the Greater Manchester area. Having had a successful but very dated website for sometime it was decided to develop a completely new site rather than tweak the existing one. Not only does it have much more information & resources but it has been developed on the Joomla CMS framework that the Impala Website team have considerable experience with. It is also exceptionally easy to change & update so the now the operations staff can update the site within seconds offering late booking discounts and special offers, without any delay at all.
